# ZUERCHER

## 1. Software and Services

Zuercher will provide the following software and services.

### 1.1.1. CAD - PowerPhone Interface (Import & Export)

This interface to PowerPhone will integrate with the existing Zuercher CAD functionality. This is a two-way interface with the PowerPhone's Computer Aided Call Handling (CACH) software. Dispatchers can manually launch the PowerPhone application from Zuercher CAD or have CAD launch it automatically based on incident codes. Once PowerPhone is launched, the dispatcher finishes the CACH call within PowerPhone. Upon accepting dispatch recommendations, the questions and responses from PowerPhone will be updated within the CAD Call for Service Command Log along with any changes to the incident code.

- Zuercher requires the Customer to be the main point of contact to Powerphone.
- PowerPhone is responsible for ensuring CACH incident codes match Zuercher CAD incident codes and that each client workstation using CACH is configured to use the Zuercher interface.

All costs related to Zuercher's implementation of the above interface is represented in the following pricing. Any third party costs or charges incurred related to the implementation of the above interface will be the responsibility of the Customer.

Zuercher Technologies is not responsible for any costs incurred by PowerPhone to implement its end of the interface.

Except as modified herein, the terms and conditions of the July 21, 2011 Agreement shall remain in full force and effect.

## 2. Pricing

Software	Qty	Price	Total
CAD - PowerPhone Interface (Import & Export)	1	\$ 5,000	\$ 5,000
