## Staff Analysis

12-30-2015

**Agenda Item:** Replacement of Bay Door

**Item Description:** Modify and replace the bay door down stairs at station #1.

**Facts and Historical Information:**

At present, the bay doors down stairs at station #1 are 12'X12', which will not fit some of our apparatus. We need to enlarge it to a 14' tall door. This has not been a big issue until now. With some updated policy change with Sherriff's office and Emergency Services, we need to house the communication van at station #1. We are currently housing it at station #4, but with the man power short fall and the new changes in response protocols, we need it moved. We've looked at a couple of options and changing the door out is the best option. Normally this would be a departmental decision, but it intel's some modifications to the door framing on the building, which must have BOC approval.

**Potential Courses Of Action:**

There are two courses of action.

1. Modify the door frame work to accommodate a 14' tall door, so the communication van will fit in the bay and other apparatus could be stored there as well.
2. Take no action and leave the communication van at station #4.

**Budget Impact:** There will be no budget impact, due to Emergency Services having the money to convert the door in their 2016 budget.

**Staff**

**Recommendation:** Approve action #1 and let Emergency Services Department have the door converted, so that it will be utilized at its full potential.
